Savings
Management

Flexible
confidence levels

Team
assignments

Lever-related
calculation methods

Approval
workflows

Tasks and
monitoring

Dedicated CL
reporting

Suppliers have
access (optional)

Attachments,
comments, emails

Extremely powerful, integrated New Product Development process, tightly integrating R&D, Procurement, Quality Engineers and Suppliers

A flexible Production Part Approval Process (PPAP / APQP) module that can be used for controlled roll-out control of any process thousands of times. Indispensable for companies with complex product line-up.

Meercat®
PPAP Module

Define multiple processes with flexible steps

Select depth level based on category and part criticality

Store terabytes of data – locally or on Amazon cloud

Suppliers have direct access to speed up communication

Data templates, documents, comments, tasks for each PPAP step

Detailed reports and email notifications help facilitate the process

NEW!
Upload complete Bills of Materials (BOMs) from engineering systems (e.g. Windchill) and track PPAP status per Project.
Calculate part criticality for incoming goods inspection.

The NCR module allows comprehensive tracking of non-compliances across the production sites.

Meercat® NCR
Non-Compliance
Reports

Flexible problem
classifications

Out-of-the-box
status reports

Links to NCRs /
warranty claims

Synchronisation
with ERP systems

Comments &
discussions

Tracking of
assigned tasks

Clear
responsibilities
+ supplier access

Notifications to
all involved

The **Compensation Claims** module allows you to easily document and recover costs related to supplier underperformance.

Compensation Claims

Compensation claims from NCRs and warranty claims

Flexible review and approval workflow

Separate team for Cost Analysis and finance approval

Factor in scrap, rework, transport, delays and other costs.

Automatic creation of a debit note PDF incl. flex legal notes

Supplier auto-approval based on Quality Agreement and value

Tracking of value changes and recovery %

Notifications to all involved

procurement

The Tool management module allows to keep track of maintenance, certification as well as project/resource assignments.
