

Procurement Performance Management

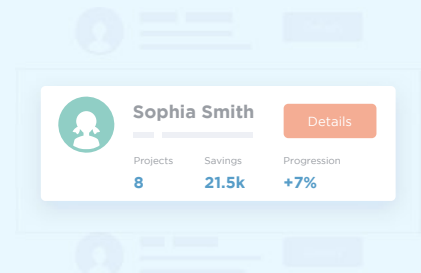

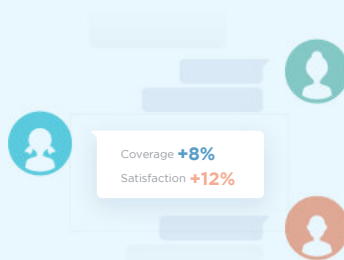

With Per Angusta's cloud-based Procurement Performance Management solution, procurement teams drastically increase agility and productivity — **all while managing and sharing their performance with stakeholders in all simplicity.**

By organizing Strategic Sourcing processes into an intuitive collaborative Sourcing Pipeline, procurement teams forecast future savings with precision, reliably communicate their impact on the business, and boost share of spend covered by approved contracts.

Per Angusta. Power up.

Per Angusta enables unique Procurement accountability, collaboration and agility:

Accountability

With Per Angusta's Sourcing Pipeline dashboard, everyone in the business can recognize your team's immediate and future impact on the bottom line.

Collaboration

Facilitate fact-based discussions with Finance and other stakeholders. Work as a team like never before around shared metrics.

Agility

Setting goals, reshuffling priorities, and tracking the individual and collective performance of the procurement team has never been easier.

1. Identify

Identify all possible opportunities to reduce spend, cut risk, and boost vendor quality. Be alerted to contract expiry dates, business teams' demands and external market events, such as potential risks with your existing suppliers — to name a few!

2. Prioritize

Prioritize sourcing projects in your Sourcing Pipeline based on criteria such as value and risk. Your team knows exactly what to do and what they need to work on next. Effortlessly reshuffle priorities when necessary.

3. Forecast

Produce a reliable forecast of contracted savings for each sourcing project. Continuously re-forecast as sourcing projects progress along the Sourcing Pipeline. In addition to qualitative benefits, enjoy a trusted pipeline figure that provides the total expected contracted savings your team is committing to delivering within specific future milestones (quarter, fiscal close).

4. Collaborate

Complete transparency in the Sourcing Pipeline facilitates agile management and collaboration, and speeds realization of savings and completion of projects.

Anticipate bottlenecks. Re-prioritize effortlessly. Greater agility also means you are better able to answer business stakeholders' requests.

5. Measure

Measure progress in meeting your procurement goals. Be alerted to events and bottlenecks that threaten your team's performance. Get Indisputable figures to demonstrate Procurement's contribution to the business.

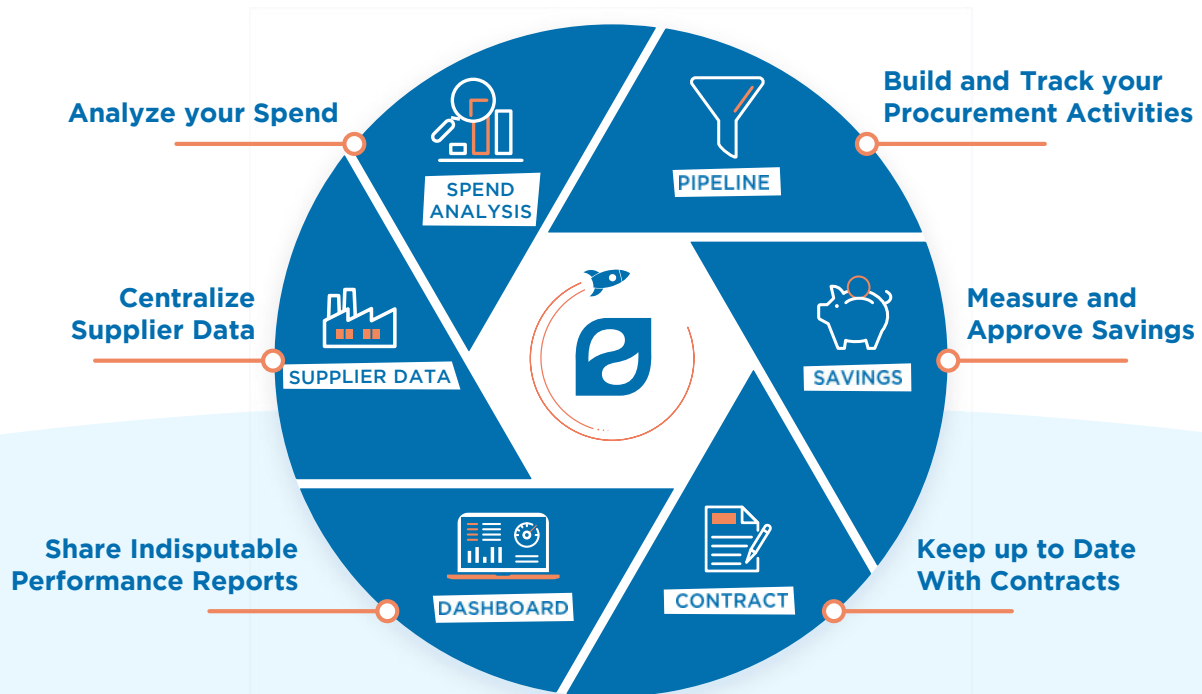

6. Communicate

Share clear progress reports with all stakeholders. Demonstrate to other departments the impact you are having on their business in terms of reduced risk, better vendor quality and lower spend. Stop being seen as the spend police but as a strategic business function.

Speed Your Way to Procurement Performance

Per Angusta covers your essential Source-to-Contract needs in an intuitive interface — all while enabling you to manage and share your performance with stakeholders in all simplicity.

Pipeline

Register opportunities and projects in your Pipeline, track their progress and set savings targets. Identifying, assessing and prioritizing savings opportunities has never been easier.

Savings

Track the results of projects, record their savings and other benefits. Ensure that procurement performance is recognized and auditable.

Contract

Keep all signed contracts in one repository. Proactively manage your contractual deadlines by scheduling alerts (termination notice, expiration date, etc.)

Dashboard

View built-in or custom reports for different modules' data. Generate procurement performance reports to share with Finance and other stakeholders.

Supplier Data

Centralize all the key information relating to your suppliers in one place, whether it is stored in Per Angusta or in a third-party system. No more chasing information!

Spend Analysis

Import spend data in Per Angusta. Tailor the information to better focus on your projects and priorities.

Lightweight Software Built for Buyers, by Buyers

Per Angusta is designed around the daily operations of procurement teams.

Painless implementation and onboarding

Implementing the platform takes as little as a few days. Onboarding can be completed in a matter of hours.

Super easy to use

Master the intuitive platform in record time. End-users can tailor it to their needs.

Ever-evolving SaaS platform

We listen to our users' feedback! We regularly add new features and improvements to the platform to benefit all customers. These updates are added on the fly — no versioning — simply log into the platform and see what's new!

Leverages what you have

Per Angusta can be used in any procurement environment. You can use it as a stand-alone platform covering your essential Source-to-Contract needs. And thanks to integrations with the world's leading procurement and finance software solutions, Per Angusta connects effortlessly with your existing systems and processes.

Built for buyers, by buyers.

Over half of our team, including our founder, has worked on procurement's front lines. This first-hand experience enables us to truly understand your industry needs.

The foundation for step-by-step Procurement digitization

Digitizing your Procurement function is a journey you must travel one step at a time. Per Angusta has developed one click integrations with the world's leading sourcing and finance software solutions. This lets you build your tailored Strategic Sourcing system around Per Angusta progressively, at your own pace.

Trusted by Procurement leaders

Procurement trailblazers in all industries trust us to turn them into what we call — bottom-line heroes. Import spend data in Per Angusta. Tailor the information to better focus on your projects and priorities.
